

Continental US, Alaska Liquid Amendments Sample Mailing Procedures

HOW YOU PACKAGE AND SHIP YOUR SAMPLES IS IMPORTANT
TO GET THE MOST ACCURATE DATA

1. Send **10 fl. oz. (300ml)** for liquid amendments in a small leak-proof bottle, with half of the bottle left empty for air space and mark it with your unique sample identification name. If necessary, you may seal around the bottle's lid with electrical tape. Additional tests may require additional liquid, please see Earthfort's Testing Order Form for more details. **Seal bottles completely.**

2. Place several paper towels or other absorbent material into a large containment bag to absorb any material that may leak out of sample containers during shipping. (See photo 2.) Multiple samples may be placed in the outer bag. Do NOT over-fill containment bag. Seal containment bag completely. (See photo 3.)

4. Place sealed containment bag(s) into a sturdy shipping box or container. Multiple containment bags may be placed into one shipping container. (See photo 4.)

5. Fill any additional space in shipping container with light weight packing material to prevent samples from shifting and potentially bursting open during shipping.

6. Fill out Earthfort's Testing Order Form with your information. **Please write clearly and carefully.** You can list four samples per sheet; use as many sheets as you need for the number of samples you want to send. (See photo 6.)

IMPORTANT - Send 100g (250 ml) per sample. For sampling questions contact Earthfort.			
Client Name: JOHN SWANLEY	Company: SULLY JONES		
Address: 26055 WILSON ROAD	Address: 4000 SULLY DRIVE

Sample 1: FRESH TEA	Sample 2: TEA	Sample 3:	Sample 4:
Material Type: SOIL	Material Type: COMPOST		
Client Name: TULIP	Company: (none)		
Date Sample Taken: 9-2-2014	Date Sample Taken: 9-2-2014		
Testing Package: (See Pg. 2 for additional info)	Price Per Sample: Qty		
Essential Biology Package: (includes bacteria, fungi, protozoa, nematodes)	\$144.00	2	
Advanced Biology Package: (includes bacteria, fungi, protozoa, nematodes)	\$144.00		
Mycological Colonies (YAM, IF FOR SOLS ONLY - include 10 inches of soil material)	\$40.00		
E. coli	\$30.00		
Remediation Consulting (Optional services)	\$150.00		

7. Enclose testing form in shipping box. (See photo 7.)

8. Seal box. List return address and Earthfort's address on outside of box.

9. Take to your preferred shipper, select fastest/most cost effective shipping you can afford; it is ideal for liquid amendments to be sent overnight as the biology in teas is perishable over time. Pay postage costs and send.

10. You will receive a confirmation email the day we receive your sample.
